PRIOTOSH DAS

SDET | 1.5+ YOE | Test Automation Engineer | Java & Playwright Specialist
Bengaluru, India | +91 9024158921 | priotoshdas50@gmail.com | linkedin.com/in/priotosh-das | priotosh265

PROFESSIONAL SUMMARY

Results-driven **SDET** with experience in building scalable automation frameworks using **Java**, **Playwright**, and **Cucumber BDD**. Skilled in integrating test suites into **Jenkins CI/CD** pipelines and leveraging AI tools like **Windsurf** to accelerate script development. Proven expertise in **API Automation**, version control (Git/Bitbucket), and reducing regression cycles. Seeking an SDET 1 or 2 role to deliver high-quality software solutions.

TECHNICAL SKILLS

- **Languages:** Java (Core/OOPs), SQL, Gherkin (Cucumber), XML, JSON.
- **Automation:** Playwright, Selenium WebDriver, REST Assured (API), TestNG, JUnit.
- **DevOps & Cloud:** Jenkins, LambdaTest, Docker, Git, Bitbucket, Slack Integration.
- **Tools:** Windsurf (AI Editor), IntelliJ IDEA, Postman, JIRA, Confluence, Android Studio.

PROFESSIONAL EXPERIENCE

GoComet | Software Development Engineer in Test (SDET) - Bengaluru, India | *Feb 2025 – Present (Promoted from QA Engineer to SDET in Aug 2025)*

- **Automation Framework:** Designed and maintained a Hybrid Framework using **Java** and **Playwright**, implementing the **Page Object Model (POM)** to ensure modularity and reduce script maintenance by 30%.
- **CI/CD Integration:** Integrated automated regression suites with **Jenkins**, enabling continuous testing and faster feedback loops for the developer team.
- **Release Management & Monitoring:** Orchestrated daily **Go-Live regression** cycles on **LambdaTest** integrated with **Slack** for real-time failure alerts, while proactively maintaining scripts to ensure reliable, cross-browser stability during critical evening deployments.
- **AI-Assisted Coding:** utilized **Windsurf IDE** to auto-generate complex XPATH selectors and boilerplate code, increasing daily script productivity by 25%.
- **BDD Implementation:** Created feature files using **Gherkin/Cucumber**, bridging the gap between technical implementation and business requirements.
- **API Testing:** Automating RESTful API endpoints validation to verify data integrity across microservices, documenting results in **Confluence**.
- **Collaboration:** Managed version control via **Bitbucket**, performing strict code reviews to maintain clean coding standards in the master branch.

IMG Global Infotech Pvt Ltd |Android Developer - Jaipur, India | *Jan 2023 – June 2023*

- Developed native Android applications using **Java**, mastering Object-Oriented Programming (OOPs) concepts essential for backend automation.
- Collaborated closely with QA teams to identify, debug, and resolve UI/UX defects, gaining a deep understanding of the Software Testing Life Cycle (STLC).

EDUCATION

- **Master of Computer Applications (MCA)** | Lovely Professional University | *2023 – 2025*
- **BCA (Data Science)** | JECRC University | *2020 – 2023*

CERTIFICATIONS

- **Baseline: Data, ML, AI** – Google Cloud
- Architecting with Google Compute Engine Specialization – Coursera
